SECTION 0: INFORMED CONSENT, COMMUNITY

The informed consent is administered to all key informants for the community and health facility level questionnaires—including community leaders/administrators, health facility personnel and other knowledgeable community members.

[ENUMERATOR: READ SCRIPT BELOW]

Hello. My name is _____ from _____, based in Maputo. In collaboration with the American Institutes for Research, we are conducting a research study to understand the living conditions of vulnerable families with young children in this area focusing on households with children under the age of two years. As part of this effort, we want to understand the community (health facility) basic attributes, representing access to services for the populations which are part of the study.

The answers provided will help the Serviços Distritais de Saúde Mulher e Acção Social and the Government of Mozambique to understand the living conditions and needs of families in the community. The information will be used to improve services in your district.

Approximately 2,100 families and all the communities they live in (health facilities they have access to) are participating in this study in Nampula.

I want to be clear that there is no direct benefit to your community (health facility) for participating in the survey. If you do not agree to take part in the study, it will not change any services or benefits that your community (health facility) receives now, or may receive in the future. If you agree to participate, you can stop at any time without penalty. We will not share the answers with anyone else in your community and you can choose to skip questions you do not want to answer. Only researchers leading the study will have access to the data and all data will be kept separately from the other information you provide in a private, secure place.

The questions may take from 20-30 minutes of your time. We will leave a card with information about the study and with contact information in case you would like to know more or you have questions even after our visit.

Do you agree to participate?
