

Now I want to ask you some questions about a hypothetical situation. Suppose you have earned 15000 Kwacha for work that you have done for a trustworthy neighbour during the last week. The neighbour gives you an option of receiving the money now, or waiting one month and receiving slightly more.

Would you prefer:

1. Kw15,000 now or	2. Wait one month for Kw25,000?
1. Kw15,000	2. Wait one month for Kw150,000?
1. Kw15,000	2. Wait one month for Kw45,000?
1. Kw15,000	2. Wait one month for Kw100,000?
1. Kw15,000	2. Wait one month for Kw65,000?
1. Kw15,000	2. Wait one month for Kw10,000?

How much would the neighbour have to pay you so that you would prefer to wait one month to be paid?

Section 12: WOMEN'S EMPOWERMENT, SAVINGS AND FUTURE EXPECTATIONS (MOTHER OR CARETAKER OF A CHILD)

Instructions: Ask these questions to only one woman in household, the biological mother or primary care-giver of any one child age 0-5.

1	Write down PID of respondent
