**VERBAL CONSENT STATEMENT – FOR HOUSEHOLDS**

*“Hello. How are you? My name is [ENUMERATOR NAME], and I am working with a team from the Ministry of Community Development, Mother and Child Health in Lusaka. We are conducting a survey of households in this district, and your household was randomly chosen to be interviewed in this community.*

*We would like to ask you some questions about your household and community. We are asking you these questions to find out more about your household, your household's economic activities, health, education, and other measures of well-being. We would like to interview youths in your household between the ages of 16 to 23 to understand aspects like their health and schooling.*

*We hope that this information will eventually benefit the entire community by allowing us to understand your living conditions that households like yours face, and ways to better support households like you. Information you share will help the Ministry of Community Development, Mother and Child Health better target services and opportunities in communities like yours, but there is no direct benefit to your household for participating in the survey. Approximately 3000 families are participating in this study across Zambia.*

*It will take approximately 1 1/2 hours to complete this questionnaire. This study is a three year study, and we have interviewed your household twice before, including last year. We will not disclose any information about you, your family or your child to anyone outside of this study. The only instance—and such occasions are rare—when we would release information about you to anyone outside the project would be if we learned someone, including you were in danger of harm. We will keep everything that you tell me private and confidential. Your name will be kept private and separate from the information you provide, in a secure office and on a password protected computer. All data will be reported in the aggregate only and reports developed from the study that will be disseminated will contain only aggregate level data. Data collected for the study will be maintained in a secure location, according to standard study procedures, and will be destroyed once all reporting activities are completed.*

*You do not need to talk to me if you do not want. You may feel uncomfortable answering some questions. You do not have to answer any question you do not want to answer. We may suggest services if someone in the household needs medical or other help. It is important you understand that the answers you give will in no way affect your status with respect to the Ministry of Community Development, Mother and Child Health. If you do not agree to take part in the study, it will not change any services or benefits that your household receives now or may receive in the future. If you have any problems, or if you feel uncomfortable answering any question, you should feel free to stop talking with me at any time.*

*You can also speak with people in the District Social Welfare Office in Town for if you have questions about this study. Is there any part of this explanation that you do not understand?*

*Will you please give me some time to speak with you? Please feel free to ask if you have any questions at any time, even before I start.*

## **Photography**

*With your permission, we would like to take a few photos of you, your home and surroundings. These photos may be used for informational purposes in presentations at professional meetings and in reports to illustrate the living conditions families like you face. You or your family will not be named in these photos nor will the specific location be revealed. Your answers will not be connected to your photographs. Would you be willing to have photos taken?*

### **Statement of Consent to be photographed.**

I understand that photographs will be taken during the study.

I agree to have photographs taken of me. (1=YES; 2=NO)

There is someone I feel close to who makes me feel secure.	I belong to a group in which I feel important.	People let me know that I do well at my work (job, domestic work).	I have enough interaction with someone who makes me feel special.	I spend time with others who have the same interests that I do.	Others let me know that they enjoy working with me (in the field, etc.).	There are people who are available if I need help over an extended period of time.	Among my group of friends we do favors for each other.
