CGP Evaluation Household Survey

Consent Form

My name is _____ and I work for _____

This is a study for the evaluation of the Lesotho Child Grants Programme. The purpose of this study is to understand the positive and negative effects of the Child Grants Programme on household and children's lives, including health, nutrition, schooling and employment. This project is run by an international team of researchers on behalf of the Department of Social Welfare in the Ministry of Health and Social Welfare of the Lesotho Government and UNICEF. Your household was randomly selected amongst the members of this village. You don't need to be currently receiving the Child grant in order to participate in this study. As part of this study we will be asking to provide some information about your household, such as who usually lives here, whether your children are currently attending school, what sort of work the members of your household are involved in, and other such questions.

Before we begin the interview, we want to make sure you understand the following information about the study:

- Your participation is entirely voluntary. You may refuse to take part in the interview, and you may stop at any time if you do not want to continue. You also have the right to skip any particular question or questions if you do not wish to answer them.
- The time it takes to complete the interview will vary depending on how many people live in your household and whether all the sections of the questionnaire are relevant to your household, but it should take no more than around two hours.
- You have the right to ask questions at any point before the interview, during the interview, or after the interview is completed.
- All information collected for this study will be kept strictly confidential. While the data collected will be used for research purposes, information that could identify you or your household will never be publicly released in any research report or publication and won't be shared with the Department of Social Welfare, UNICEF or any other government or international institution.
- The intention of the study is to conduct further interviews with you in the future. As a result, your personal details will be kept on record in order that you can be re-contacted to participate in future studies that form part of this project. However, we will ask your permission to participate in the survey again each time. Agreeing to participate now does not mean you have to participate in future surveys.

By signing below, you signify that you agree to participate in the study and that your participation is entirely voluntary.

CGP Household Survey

Section HH1: Household roster & Demographic Information

We are now going to be asking some questions about your whole household, including some information on members who only live with you occasionally. These questions include information on education, access to grants, health and labour.

For this section, we would like to talk to the head of the household or an adult who knows about the household. We would like to know about each person who belongs to this household and does not have another family, even if they may be away for long periods of time to work, receive education or visit relatives. **Household membership criteria is:**

- a) member does not have another family AND
- b) member has lived under this "roof" or within the same compound/homestead/stand at least 15 days during the last 12 months OR arrived here in the last 15 days and this is now usual residence AND
- c) member shares food from a common source with other household members when present
